

1 MULTIPLE VIDEO DISPLAY GAMING MACHINE AND GAMING SYSTEM
23
4 ABSTRACT OF THE DISCLOSURE

5 A gaming machine includes a cabinet having a game video display mounted on a front
6 side of the cabinet. The gaming machine also includes at least one more additional video display
7 mounted on the front side of the cabinet either above or below the game video display. A player
8 control device is also mounted on the front side of the cabinet. This player control device may be
9 separate from the video displays or may be integrated with one or more of the video displays in
10 the form of a touch screen portion of one or more of the video displays. The player control
11 device may include a separate touch screen display mounted on a ledge projecting forwardly
12 from the front side of the gaming machine cabinet.
